

Mobile phone capture images conversion software

Video Blog Update from Mobilephone

VLOG Maker

VLOG Maker (VEE Log Maker) is software that sends movies in various formats such as these taken from a mobile phone to a blog as an attached file and automatically places the movie on a blog or web site.

VLOG MAKER SPECIAL POINTS

- Easy to use because video blogs can be updated just by mobile phone usage
- High quality image resolution due to utilization of the very latest Flash 8 video codec
- Compatible with movie formats of three of the major mobile phone companies in Japan
- A business model that provides for new software licensing

VLOG Maker optimum for following usage

- Utilize movie information which is captured in real time
- Provided movie information to someone who can not use a pc
- Share movie information without using any external service
